ANIT SINGH

Junior Full Stack Developer · Frontend Specialist
Noida, Uttar Pradesh | 8580807687 | anits8489@gmail.com

PROFESSIONAL SUMMARY

Junior Full Stack Developer with strong expertise in frontend development, specializing in building responsive and dynamic web applications using HTML, CSS, JavaScript, React, and Next.js. Hands-on experience in API integration, state management using Redux Toolkit, and creating clean, user-friendly interfaces. Skilled in developing modern UI/UX with smooth animations and interactive components. Currently learning backend development with Python and Django. Passionate about building scalable, high-performance applications.

WORK EXPERIENCE

Junior Full Stack Developer
January 2026 – Present

Full-Time

- Promoted to permanent employee following successful completion of a 6-month frontend internship.
- Managing full-stack responsibilities with a primary focus on frontend excellence and backend integration.
- Integrating complex REST APIs and SMTP services for seamless data flow and communication pipelines.
- Applying Python and Django fundamentals to contribute to end-to-end application development.

Frontend Developer Intern
July 2025 – December 2025

Internship

- Completed a 6-month intensive internship, contributing to multiple live production projects.
- Built and maintained responsive web applications using React.js and Next.js.
- Translated Figma designs into pixel-perfect, accessible user interfaces with seamless UX.
- Optimised website performance for fast load times and cross-browser compatibility.

PROJECTS

Visalive – Job Portal Web Application | *In Progress*
Tech: Next.js, React, Redux Toolkit, REST API

- Developed a fully dynamic job portal using Next.js and React.
- Built a company admin panel to post jobs and manage applications.
- Implemented job application system where users can apply directly.
- Designed workflow for hiring and rejecting candidates via dashboard.
- Worked with API-based data handling and state management using Redux Toolkit.

Frontend Developer – Multiple Live Projects | *Live*
Tech: Next.js, React, Markdown | hyundaiheatpumps.co.in · reddyanna888.com · 1xfour.co · lotus70.com

- Worked on multiple live web applications built with Next.js for various clients.
- Developed and optimized UI for gaming platforms ensuring responsive, smooth UX.
- Implemented blog systems using Markdown files without backend dependency.
- Contributed to Hyundai Heat Pumps website including UI and blog integration.
- Focused on performance, responsiveness, and clean UI design across all projects.

Biogiri UI – E-commerce Frontend | *Live* | *biogiri-project.vercel.app*
Tech: React, React Router, Animations

- Built a fully responsive e-commerce UI using React with smooth navigation via React Router.
- Developed interactive UI with modern animations and reusable components.
- Focused on clean UI/UX and responsive design across all devices.

Crypto Flow UI – Landing Page (Dashboard Design) | *Live* | *crypto-flow-topaz.vercel.app*
Tech: React, Responsive Design, Component Architecture

- Developed a modern crypto dashboard landing page UI using React.
- Focused on responsive design, clean data visualization layout, and reusable components.
- Created smooth and visually appealing UI with modern design patterns.
